OBJECTIVE

My goal is to bring experience, business focus, energy and knowledge to my job to build the best products together with my clients. I am a cutting edge lover & Javascript enthusiast with focus on building high scalable and performant front-end architecture for e-commerce companies.

WORK EXPERIENCE

From July 2015 to March 2016

Team Lead Frontend Development

Lieferando.de (yourdelivery GmbH / Takeaway Group)

Key Responsibilities & Duties

I worked 5 years as JavaScript / Node.js engineer in a big european food delivery platform. With focus on building a scalable front-end architecture based on cutting edge technology. At last my main responsibility was leading an international team of 10 front-end engineers to build the best product. Our target was it to be everyone's first thought when they get hungry!

From April 2011 to June 2015

Node.js / JavaScript Engineer

Lieferando.de (yourdelivery GmbH)

Key Responsibilities & Duties

Disassembled a big monolithic PHP application into a scalable front-end architecture based on cutting edge technology like Node.js, Can.js, Sass and Gulp.

EDUCATION

From 2012 to 2015

Media Informatics Bachelor Degree

Beuth University of Applied Sciences Berlin

From 2006 to 2010

Information Technology A Level
